

WMD from Iraq Matrix

by Roy A. Reinhold, © April 2004

WMD is the acronym for Weapons of Mass Destruction, and functionally WMD is comprised of nuclear, chemical and biological weapons. While nuclear weapons create fear in the hearts of people due to the immense explosion and subsequent radiation fallout, it is the poor man's nuclear equivalent of biological and chemical weapons which have the the greatest potential for widespread casualties. Any competent chemist can create chemical weapons with modest equipment. Biologicals require more research and development, but when made, a single flask or large vial can have enough lethality to kill hundreds of thousands of people depending on the biological used. This is especially true when the biological weapon creates a contagious disease easily passed through the population.

Of course, any right thinking person would never unleash a contagious biological for which there is the possibility of it coming back to their own population and decimating it. The following is a partial list of Biological Warfare Agents:

- Anthrax
- Botulinum Toxins
- Brucellosis
- Cholera
- Clostridium Perfringens Toxins
- Congo-Crimean Hemorrhagic Fever
- Ebola Haemorrhagic Fever
- Melioidosis*
- Plague
- Q Fever
- Ricin
- Rift Valley Fever
- Saxitoxin
- Smallpox
- Staphylococcal Enterotoxin B

- Trichothecene Mycotoxins
- Tularemia
- Venezuelan Equine Encephalitis

* Not on any official BW threat list

With regards to chemical weapons, the Federation of American Scientists website suggests that there are thousands of toxic chemicals that could be used as weapons. Principally they fall into the following categories: Classic and Vesicants (like mustard gas), Nerve Agents (G-agents and V-agents like sarin and VX), Incapacitating Agents, and Toxins (like Ricin from the castor bean).

Although many people in the USA now think that Saddam Hussein did not have any WMD, the fact is that he used chemical and biological weapons against the Iranians in the 8-year war in the 1980's and used them after the 1st Gulf War in 1990/1, against the Kurds in the North and the Shiites in the South. This matrix explores the whole idea of WMD from Iraq, and if there were any, then where did they go?

You'll be surprised to see in the matrix, that Saddam moved the chemical and biological weapons to underground sites in Syria and the Beqaa Valley of Lebanon (Bikah). DEBKA reported before the war began on March 19, 2003, that Saddam had paid \$25 million (US\$) to Bashar Assad the president of Syria to facilitate storage of these sensitive WMD materials. Both USA and Israeli satellites tracked the heavily guarded convoys going from Iraq to Syria in the period from January 10 to March 10, 2003, and a portion also likely went to the Beqaa Valley of Lebanon. Israeli intelligence agents on the ground also confirmed it. DEBKA is a commercial intelligence website and organization using retired Israeli agents from the Mossad and military intelligence. They seem to have ears everywhere throughout the Middle East, although they are not correct all the time (which is true of any intelligence agency). What is important for you to know is that DEBKA is not a government agency or affiliated with any government, so their accuracy and reputation are all they have if they wish to remain commercially viable (i.e., people subscribing to the services).

The producers of the History Channel TV special (which premieres on April 11, 2004) asked me to do a new matrix for the show related to Iraq, or Afghanistan/Osama, or Middle East issues. I chose to do a matrix on WMD from Iraq for the TV show. Since I have not seen the show yet myself, I don't know how much of the matrix (if any) will survive the editing process. However, you are going to get the whole thing here in the next few pages. Whatever is seen on the TV show, the following pages are going to give you much more. First, the following is from January 5, 2004 reporting on a Syrian journalist's article concerning WMD from Iraq.

A senior Syrian journalist reports Iraq's WMD located in three Syrian sites.

Nizar Najoeff, a Syrian journalist who recently defected from Syria to Western Europe and is known for bravely challenging the Syrian regime, said in a letter Monday, January 5, to Dutch newspaper "Di Telegraaf," that he knows the three sites where Iraq's WMD are kept. The storage places are:

1. Tunnels dug under the town of al-Baida near the city of Hama in northern Syria. These tunnels are an integral part of an underground factory, built by the North Koreans, for producing Syrian Scud missiles. Iraqi chemical weapons and long-range missiles are stored in these tunnels.

2. The village of Tal Snaa, north of the town of Salamija, where there is a big Syrian airforce camp. Vital parts of Iraq's WMD are stored there.

3. The city of Sjnjar on the Syrian border with the Lebanon, south of the city Homs.

Najoeff writes that the transfer of Iraqi WMD to Syria was organized by the commanders of Saddam Hussein's Special Republican Guard, including General Shalish, with the help of Assif Shoakat, Bashar Assad's cousin. Shoakat is the CEO of Bhaha, an import/export company owned by the Assad family.

In February 2003, a month before America's invasion in Iraq, **DEBKAF** and **DEBKA-Net-Weekly** were the only media to report the movement of Iraqi WMD, the efforts to bring them from Iraq to Syria, and the personal involvement of Bashar Assad and his family in the operation.

Najoeff, who has won prizes for journalistic integrity, says he wrote his letter because he has terminal cancer.

Syrian journalist Nizar Najoeff defected from Syria and wrote in a letter to the Dutch newspaper "Di Telegraaf" that Iraq's WMD is hidden at 3 sites in Syria: 1. tunnels under the town of al-Baida, 2. village of Tal Snaa, and 3. city of Sjnjar. How reliable is this information? No one knows.

Another site to which convoys went is the section of the Syrian Desert known as Dayr Az-Zawr in Syria's 600 sq. mile Al Jazirah province, which is wedged between the Turkish and Iraqi

borders. It is suspected that entire semi-trailers were buried there similar to the way Saddam had buried many of his jet fighters in the desert west of Baghdad. Those fighter aircraft were only found because someone stumbled upon them.

The last suspected site for Iraq's WMD is the Beqaa Valley of Lebanon, the stronghold of the extremist Hizbollah terrorist organization.

In doing the matrix, I concentrated on biological and chemical weapons and ignored nuclear related materials. Biologicals take up very little space and can be easily hidden in a small area. Chemical weapons take up more room, but it still isn't like conventional weapons which require a lot of room. Does it make sense that there would be multiple sites? Yes, money talks and can buy anything in the Middle East, so just a tiny portion of Saddam's pilfered billions stolen from the Iraqi people could buy storage and protection for these biological and chemical weapons. I'm not saying that the matrix doesn't have additional terms related to nuclear materials, it's just that I haven't developed those yet.

Graphic shows Saddam greeting the American soldiers after they rescued him from the hole in the ground.

The main term in the matrix was biologicals, and I looked for a matrix related to Iraq, Syria, and Lebanon (Beqaa Valley of Lebanon, Bikah in Hebrew). The matrix is a toroidal Torah matrix, and it shows a tremendous amount of information related to the previously mentioned intelligence. **The matrix has 31 terms containing terms that are mostly sentences, and statistical odds of 1 chance in 3.7 times 10 to the 350th power! That's 3.7 followed by 350 zeroes!**

The following two pages contains the matrix report, and following those pages I will explain things, since 31 terms may be a lot for you to digest quickly.

The ELS reference is 4756 characters between rows.

The matrix starts at Leviticus Ch 25 V 33 Letter 51 and ends at Deuteronomy Ch 19 V 9 Letter 23. Wrapped.

The matrix spans 404360 characters of the surface text.

The matrix has 86 rows, is 100 columns wide and contains a total of 8600 characters.

Total matrix R-value= 350.568

Matrix odds are: **1 chance in 3.7 times 10 to the 350th power**

Before I explain the matrix results, let me preface it by saying that if you are a Hebrew expert and recognize an error, let me know and I'll change it. One tiny error in a single term doesn't negate the matrix in any way. Any input is appreciated.

I mentioned earlier, that DEBKA reported before the war started in March of 2003, that Saddam had paid off Bashar Assad the president of Syria with \$25 million (US\$) as grease to facilitate hiding the chemical and biological WMD from Iraq. Rumor has it that Saddam was told before the war by Russia and China to remove all traces of WMD from Iraq, since their fingerprints were all over it (and perhaps France and North Korea too). Term 31 in the matrix report touches on this payoff.

31. A hole/cave is for you Damascus. He makes a noise of you, the folly in your covenant with the father of the vial/flask.

The father of the vial/flask (of biologicals) is Saddam, and Damascus refers to government of Syria headed by Bashar Assad. The matrix is saying that Syria's agreement to hide the biological and chemical WMD is folly. Why? As the matrix shows, there is going to be a showdown over it in 2005 (discussed later). Meanwhile, term 30 also sheds light on it.

30. Sing to him, "Thus Damascus he saw them; you will turn aside; undertake a price; he will prevail."

The price mentioned in term 30 is the grease payment by Saddam. Where it says, "he will prevail," it is talking about the "coastlands" who have a showdown in 2005. Term 26 is referring to the biologicals, which I believe are in the Beqaa Valley (Bikah).

26. And it dwelled in a cave. Does it fail says YHVH? For the poor man and threshing of people are for a sign to me.

I believe that the biologicals or chemicals are stored in a cave in Beqaa Valley of Lebanon, protected by the extreme Hizbollah terrorists. See terms 10, 7, 16, 22, 21, 5, and 4.

10. Were heaps of ruin in the Bikah (Beqaa Valley) shame at the throat of a tyrant?

7. To the leg of the triangle with a cave of jugs/vials, they passed by.

16. In the day you desolate the high part of the mouth of the Bikah (Beqaa Valley), I will bring over her present/gift.

22. And a source of strength is the battering ram of 5765 (year 2005), woe to your valley.

21. 5765/2005 will vaporize your countryman. He will break in pieces for it.

5. A weeping over deceit/fraud; biologicals are the terror of man (the dead).

4. Thus your chemicals he attacked.

Although there is direct intelligence evidence of WMD from Iraq in Syria, and the Syrian journalist, Nizar Najoeff, identified where the WMD is hidden in Syria, yet the Bible code matrix seems to show that it is direct evidence of biological and/or chemical WMD in the Beqaa Valley of Lebanon (Bikah) which will cause a future showdown in 2005 (5765). Term 21 above is relating what will happen to Lebanon and to some extent, Syria as term 28 shows:

28. In one heap of ruins, 70 of Damascus we will slay/kill. You made them to dig. You promised/vowed, "here is my reward."

And how do we know who is the country that has the showdown with Syria and Lebanon over the WMD from Iraq? Term 15 is telling.

15. A fleet of ships of the coastland astonished a nation. And is my container in the heap of ruins? You become afflicted. He stumbled over the affliction of a chemical.

I believe that the "coastland" refers to the USA and perhaps includes Great Britain. The information in term 16 above has not happened yet, where this fleet of ships from the coastland desolates the high part of the entrance to the Beqaa Valley in Lebanon. What the matrix seems to show is that there is a use of chemical/biologicals in the latter part of 2004 or early 2005 which precipitates this military response. Note that I did this matrix over a couple of weeks in November 2003 in order to be filmed for the TV show in early December 2003 (the show that premieres on April 11, 2004).

11. He/it turned them back from 5763/2003.

17. 5764 (year 2004) is the source/originator.

Term 11 is citing the war in Iraq which took place in 2003, and where "it" turned them back, I believe it is referring to a future use of chemical/biologicals. Term 17 cites 2004 as the originator, which causes the military response against the Beqaa Valley and Damascus in 2005. As term 21 above relates, the military response over the use of chemical and perhaps biologicals is devastating to Lebanon.

24. Lebanon is a sign, (he emptied it).

18. He was ashamed of 5765 (year 2005).

19. One nation of 5765/2005, Who?

20. Sing of 5765/2005, "their enemy to multiply."

23. They will sprinkle Lebanon.

Although the matrix indicates that it is the use of chemicals/biologicals that causes the military response and attacking of the Beqaa Valley of Lebanon and Damascus, we don't know any more than that 2004 (year 5764) is the source or origination of this escalation. Perhaps Al Qaeda coordinates with Damascus on the use of chemical/biologicals in order to throw the Americans out from Iraq, or to sway the USA election in November of 2004 as they did in Spain a couple of days before Spain's election. However, that is speculation on my part.

There is much more that can be gleaned from the matrix report, but I just wanted to give the viewers of the TV show more than is likely to be seen on the new History Channel special. The matrix is not trivial. Spend some time looking over all the terms in the matrix report, and you can draw additional conclusions.
